

We made Capital One.
We made penicillin.

We made disk-shaped teeth from a slug of synthetic diamond.

We made bulk bags.
We made fighter jets.
We made neonatal incubators.

We made the Yakov Sverdlov.
We made the Novik.

We made with our own hands Trump Tower and internment camps.
We made with our own hands union halls and health clinics.

We made fruit that would cross the sea without incurring a bruise.
We made electric fences.

We made 20,000 miles of high-speed rail.
We made cattle wagons.
We made each one of the terminals.

We made hospitals in days.
We made First Strike MREs and Hummers.

We made surge morgues and the Perseverance.
We made vaccines with and without patents.

We made solar farms that float on flooded coal mines.

We made wildlife underpasses.
We made forests.

We made Lactogen for the Nestlé corporation.
We made formula for our young.
We made creches.

We made coffins and we made cradles.
We made double-acting tankers.

We made EpiPens.
We made epinephrine autoinjectors.

We made ad screens, having mastered the synthesis of a liquid crystal polymer.
We made ink from the smoke of burning oil.

We made manifestos.
We made chandeliers.
We made beacons.

We made bot swarms to up or downvote feature requests.
We made bacteriophages.

We made machines that were trained to model the grain yield of a country.
We made cables the length of the ocean floor to run trades in mortgage-backed securities.

We made fulfillment centers from Lodz to Pernambuco.
We made the Robostow and yet are driven to breaking.
We made warehouse paternosters.

We made harvests of Roundup Ready crops.
We made for the Roche group the necessary antibodies.

We made organoponicos in spite of the siege.

We made factories to make factories.
We made factories to make war.

We made houses of culture.
We made luxury bunkers.

We made tractors and we made tanks.
We made the engines run.

We made time-capsules.
We made medals.

We made decisions or not.

We can decide.
